

thermoboard

The Thermoboard is an underfloor heating board, produced from EPS. The Thermoboard accommodates 16mm or 20mm heating pipes. The boards have an overlap on each joint which enables them to lock together during installation. These boards can be manufactured in thicknesses to suit customer specific requirements in increments of 5mm.

Size & Weight

Weight	1.2—5.3kg/m ²
Depth	60—225mm
Width	600mm
Length	1200mm

Certifications & Ratings

Certifications	IAB, NSAI, ETA, LABC
External Fire Spread	Class 0

Commercial

Typical Use	Insulation for Ground Floor/Underfloor Heating
-------------	--

Materials & Finishes

Materials	EPS
