

thermofloor

The Thermohouse insulated flooring panels are robust and lightweight. They can be easily and quickly installed as shuttering for concrete floors without requiring lifting equipment. These panels can incorporate reinforced structural “T” beams at 600mm centres. The connection of the concrete and steel between the Thermowall and Thermofloor systems provide for a superb reinforced concrete structure.

Size & Weight

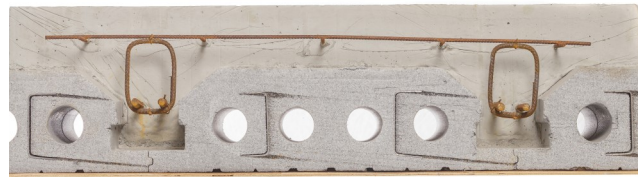

Weight	10.0kg/m ²
Depth A	160mm
Depth B	210mm
Max Width	600mm
Max Length	9000mm

Technical

Thermal Conductivity (EPS)	0.030 W/mK
Density (EPS)	25-26kg/m ³
160 mm Floor Panel	0.237W/m ² K
210 mm Floor Panel	0.151W/m ² K

Certifications & Ratings

Certifications	IAB, NSAI, ETA, LABC
External Fire Spread	Class 0

Commercial

Typical Use	Floors & Roof
-------------	---------------

Materials & Finishes

Materials	EPS & Galvanised steel ties
-----------	-----------------------------
