

thermorooft

The Thermohouse roofing panel provides a warm roof with superb airtight qualities. The Thermorooft panels are manufactured to length and require intermediate support at 4m centres. These lightweight panels can be installed quickly and easily without the need for lifting equipment. The panels can be used to suit any design, whether traditional A-shaped, flat, mono-pitched or curved.

Size & Weight

Weight	13.0kg/m ²
Depth	250mm
Width	510mm
Max Length	12000mm

Technical

Thermal Conductivity (EPS)	0.030 W/mK
Density (EPS)	25-26kg/m ³
160mm Floor Panel	0.150W/m ² K

Certifications & Ratings

Certifications	IAB, NSAI, ETA, LABC
External Fire Spread	Class 0

Commercial

Typical Use	Double & Single Span Roof
-------------	---------------------------

Materials & Finishes

Materials	EPS & Steel C-Sections
